

## **MSK/Sports Physiotherapist, F/T (or P/T 30+ hrs)**

**Pinnacle Spine & Sports** is a multi-disciplinary practice of high regard in Concord West (Sydney).

### **Why join us?**

We have identified an opportunity to change the way that allied health care is provided in Australia. Our mission is to shape the perception (and misconceptions) of active & passive care models to enhance the multimodal approach and get the best long-lasting results for our patients.

We aim to change the way people think about their health & wellbeing, and we're looking for a team member who shares that drive and purpose.

We also offer the following:

- **Flexibility** - preference is for a full time practitioner, however we would consider part-time (min 30 hrs/wk) for the right candidate, or even 2 practitioners at 18-30 hrs/wk with a view to grow to full-time in the near future
- **Evidence-based** - Keen dedication to maintaining best practice multimodal approaches based on sound evidence
- **Professional development** - Ongoing development opportunities and contribution towards PD
- **Reputable** - 15 year established business with great community reputation
- **Support** - One to one mentoring available for practitioners if desired
- **Other opportunities** - Potential to take up positions with local sporting clubs and within the local gym with whom we have professional partnerships

### **About the opportunity**

We are looking for a **Musculoskeletal or Sports Physiotherapist** to join our team in Concord West. The successful candidate will be a self-motivated & driven musculoskeletal physio who will work with our allied health team to help continue to grow our practice into a leading multidisciplinary centre.

The successful candidate will have a desire to co-manage patients with other health professionals when indicated, and not simply self-manage their load.

This position is replacing a current physio who has had to unexpectedly (and somewhat reluctantly) relocate overseas. You will therefore be taking over an existing patient base with room to grow further.

We have recently signed an agreement with a large local sports club that will see us provide sports coverage to more than a dozen teams and several hundred adult sports team members. This will involve a combination of mid-week training coverage and some Saturday game-day availability (though not every week initially), plus the potential for several hundred sports team members to come in and see us at the clinic during the week through our partnership agreement. You will therefore need to be confident diagnosing and managing acute sports injuries. Strapping & taping experience a bonus, but not essential as training can be provided.

*We're a fun team who recognise that turning up to work every day has to be enjoyable and that you have to work to support your lifestyle, not the other way around.*

### **About you**

- Dedicated to providing excellent patient care
- Exceptional communication skills

- Willing to work in a team environment and co-manage patients with other professions such as chiro and remedial massage
- Availability on Saturday mornings and some evenings until 7pm
- Self-motivated and driven to create change
- Committed to professional development
- Experience in sports or a keen interest to learn quickly

*Qualifications and experience*

- Undergraduate or Postgraduate Physiotherapy degree
- Professional indemnity insurance
- Current registration with AHPRA with no restrictions

*Exceptional new graduates through to experienced level 3 practitioners welcome to apply. Please email cover letter and CV to [ian@yourpinnacle.com.au](mailto:ian@yourpinnacle.com.au). Please do not call the clinic for further information on this role, email only.*
